

UKG Project: We've hit pause

IT's HAPPENING. JUST NOT RIGHT NOW

Every journey has its challenges and we've hit our first one!

Our project team has been working hard to meet our Go Live date however, there are a number of solution decisions that need to be made which has caused us to hit pause on our planned Go Live date of July 2021.

We may be hitting pause on the Go Live date, but we are NOT slowing down on the work!

- Our project team and the UKG team have heard the feedback and know what needs to be done.
- We will continue perfecting system functionality and processes so we can be 100% sure we roll out a system you can trust.
- Getting it right is more important than getting it done quickly.

What happens now? What can I do?

- Stay tuned for more information on our new go live date.
- Stay patient. We promise it will be worth the wait.
